

## **Airwolf Aerospace's 36 Month Enstrom 480 TT Straps have received EASA STC**

Middlefield, Ohio. September 8, 2015 – Airwolf Aerospace has received EASA STC 10054670 for its TT Straps for Enstrom 480 helicopters. FAA STC SR03465CH was received in June of this year. Airwolf's Enstrom 480 TT Straps have a life limit of 36-month/1,200 hours which is 50% increase in the calendar life previously available.

The longer life Airwolf-manufactured straps can be procured through Enstrom, or directly from Airwolf. Airwolf's 36 Month Enstrom 480 TT Straps in stock for immediate shipment.

Airwolf has built a reputation for manufacturing cost-effective, reliable products. They are pleased to be able to bring its significant expertise in TT Straps to Enstrom building on its development and launch of extended life TT Straps. Airwolf began shipping FAA STC'd Bell 206 TT Straps in March of 2011 and was the first company to bring 36 Month FAA-PMA certified TT Straps to market for Bell 206 Jet Rangers, 206L Long Rangers, and OH 58s. Airwolf also has STC'd TT Straps for Bell 204, 205, 212 and UH-1 Helicopters.

Airwolf Aerospace technical director, John Montana, said, "We are now an Enstrom OEM and aftermarket TT strap supplier. This achievement underscores our adherence to Enstrom's strict qualifications and certifications needed for the supply of approved parts. We offer better value for Enstrom and Bell operators across the board. We are pleased to be able to add Enstrom TT Straps to our previous very successful TT Straps programs."

"Collaborating with Enstrom on this product, we offer TT Straps for new production helicopters as well as all of the 480's in operation worldwide. Airwolf is committed to bringing essential parts to rotorcraft owners at a reasonable price."
